## Frequently Asked Questions

### **Is coloured hair suitable for Yuko straightening?**

*Generally yes it is. We recommend that if hair is going to be coloured, it is done at least two weeks before or two weeks after the straightening is done. Highlighted hair may or may not be suitable. In any case the condition of the hair should be assessed by a stylist before the straightening is done.*

### **How often should I have the straightening done?**

*The average time between straightening treatments is 4 - 9 months. Hair texture and speed of growth amongst other factors will determine how often you should have your hair straightened.*

### **Will I still have to blow dry my hair?**

*After having YUKO straightening you will be able to 'wash and go'. Once re-growth occurs you may find it necessary to style the new growth.*

### **Is there anything I shouldn't do with my hair after the straightening?**

*For 48 hours after having the straightening done you should avoid doing anything with your hair that you would not want to remain there, e.g. crimps from rubber bands, clips and hats. You should not wash your hair for the first 48 hours after the straightening. You should not colour your hair for at least 2 weeks after straightening.*

**We're always happy to help! So, please contact Creations directly if you have any specific questions regarding the Yuko straightening system.**
